WHAT: Have you ever wondered...who is a possible candidate for a transplant? How do you get on a transplant list? Who can be a donor? How long is the waiting time? Once transplanted, what can I expect? What is rejection and what can you do about it? What are the financial implications of transplantation. Is there an age limit? If one of our family members might be a donor, what must we do?

Ms. Gray and Ms. Siegel will give an overview of transplantation, the transplantation work-up process, as well as the social and financial issues associated with transplantation. Dr. Nibhanupudy will complete the program with an explanation of donor types and surgical procedures, and will be available for questions following the presentation. Refreshments will be served.
